

Environmental Policy

Our policy statement

Western Power is the principal electricity transmission and distribution business in Western Australia. We are committed to operating the network safely, reliably, efficiently and sustainably, delivering electricity in a manner that meets community needs and expectations.

As an energy solutions business our activities will be planned and conducted to reduce our environmental footprint for the benefit of current and future generations.

Our environmental objectives

We are committed to:

- integrate environmental considerations into all parts of our business planning and decision-making processes
- sustainable development and working cooperatively with our community and stakeholders to deliver innovative solutions for the future
- protect the natural environment, our heritage and local visual amenity; preserve biodiversity, and prevent pollution
- comply with applicable environmental laws and aspire to higher standards within the business, resulting in a shift from compliance to innovation
- provide our employees with the necessary education and ongoing training to achieve a culture of responsible environmental management
- reduce the environmental footprint of our business
- establish and maintain standards, objectives and targets to ensure continual improvement in our environmental performance
- engage in enduring and collaborative environmental partnerships that align with our business values

Our environmental responsibilities

Environmental leadership and adherence to the Western Power Environmental Policy is the responsibility of all Western Power employees and contractors, suppliers and vendors. The Managing Director and Executive Management are accountable to the Board of Directors for the development and implementation of this policy through the Environmental Management System.

Doug Aberle Managing Director
