Notes

- [1] These charges apply only when a suitable low voltage mains supply exists in the street in front of the site address. If these mains do not exist then works required to extend the network will incur an additional charge.
- [2] Western Power will not energise a connection or reconnection until we have received a completion notice from your electrical contractor. This is a regulatory requirement.
- [3] Western Power standard supply is up to:
- single phase: 63A (urban areas) / 32A (rural areas and towns) or
 - 32A per phase for multiphase (all areas) or
 - consumer mains size of 35mm² (all areas)
- [4] If these services are required as part of “pole to pillar” installation, the price of the disconnection or reconnection is included in the cost of that installation.
- [5] The installation of a multi-phase meter may incur additional retail charges. Please check with your retailer.

Terms and conditions

These terms and conditions shall form part of the contract unless modified in writing by an authorised representative of Western Power.

1. **Payment.** Payment is due 30 days from the date of issue of Western Power’s invoice.
2. **Credit check.** Western Power is authorised to enquire as to the credit-worthiness of an applicant and retains the right to decline to perform or further perform the services whenever Western Power does not receive an acceptable credit reference (in its sole opinion). The applicant acknowledges and agrees that it shall have no claim or right or cause of action against Western Power by reason of Western Power declining to perform or further perform the services in the circumstances described in this clause.
3. **Start and finish of works.** Western Power does not guarantee to perform the services by a stipulated date or within a stipulated time from its acceptance of this request.
4. **Force majeure.** Western Power shall not be liable to the applicant for any loss, damage or expense caused by attributable failure or delay in its performance of the services, due to force majeure. Force majeure means any cause or event which is not reasonably within the control of the party affected and includes acts of God; strikes; lockouts; stoppages or restraints of labour or other industrial disturbances; war, acts of public enemies, riot or civil commotion or sabotage; fire, explosion, earthquake, landslide, flood, washout, lightning, storm or tempest; breakdown or an accident to plant, machinery, equipment, lines or pipes howsoever caused; failure of suppliers to supply equipment or machinery; and restraints, embargoes or other actions of any government.
5. **Consequential loss.** Damages shall be limited to damages for direct and foreseeable loss attributable to breach or default under this agreement. The rights of either party to damages for indirect or consequential loss are expressly excluded. Neither party shall be liable to the other for any loss of profit suffered by a party to this agreement or any other person.
6. **Modification.** A purported modification, variation or amendment of this agreement including the scope of works or any waiver of any rights of any party or any approval or consent shall have no effect unless in writing and signed by both parties.
7. **Application of acts and by-law.** Nothing contained in these terms and conditions shall in any way limit the operation or effect of the *Electricity Corporation Act 1994*, *Energy Operators (Powers) Act 1979*, or any regulations, by-laws or orders made pursuant to those written laws.
8. **Additional charges.** Work is limited to the services unless expressly stated in writing and signed for and on behalf of Western Power. Cancellation or revision of services will result in an administration fee. Extra charges apply for work done outside of normal Western Power working hours.
