26 June 2010

Dear Resident,

### **Western Power Wangara substation & power line reinforcement works – project update**

As you may be aware, construction is underway on the Western Power Wangara zone substation site located at 80 Windsor Road, Wangara.

Western Power has commenced construction of two 132,000 volt (132 kV) transmission lines, which are required to connect the substation into the existing Landsdale–Mullaloo line located on Wanneroo Road. One line will be constructed along Lancaster Road, and the other on Windsor Road – details are provided in the map below.

Western Power would like to advise that between 29 June and 2 July, the installation of 2 steel poles and the relocation of 3 wood poles will require one North-bound lane of Wanneroo Road (near the intersection with Lancaster Road, and then near the intersection with Windsor Road) to be closed between 9 am and 3 pm for the entire duration.

The stopping of traffic on Wanneroo Road will be required for approximately 5 minute periods on several occasions between 12 and 16 July to allow for the lines to be strung across the road safely. For the duration of this period one North-bound lane of Wanneroo Road will also be closed 9am-3pm.

Some other disruptions may be experienced on Lancaster and Windsor roads as a result of the work being undertaken and the construction vehicles in the area, and a Traffic Management Plan has been put in place to minimise disruptions and protect the safety of motorists.

In the coming weeks, a number of wood poles will be delivered to the site and will be stored in various locations along the planned line route. Construction crews will endeavour to store the poles in locations which will cause minimum disruption to businesses in the area.

You may also be contacted by construction crews regarding safe parking of vehicles to ensure construction of the line can be undertaken safely, and with no damage to cars parked in the area.

The substation is to be completed by late 2010, when forecasts indicate that the existing Landsdale and Mullaloo substations that currently provide electricity to the area will reached their capacity.

For any inquiries related to the Wangara reinforcement works, please contact Ben Schneider on 9326 6378.

Yours sincerely
