

STAR RATING MONITOR SHEET

Use this worksheet to work out how your household is rated! More stars means lower energy bills and reduced greenhouse emissions.

HERE'S HOW YOU DO IT:

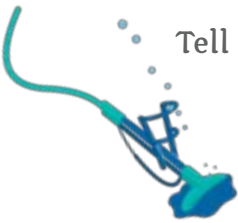

Work with your parents to count how many of these activities are being done at home. Circle how many stars you think your house is.

Switch lights off when they are not being used

Set air conditioner to 24 degrees

Tell your parents to run the pool pump after 9pm

Shut the curtains

Reach for the stars! Talk to your parents about five star-rated appliances

Use energy efficient light globes

Power down 4-9pm

Switch off TV's and computers at the wall

Install insulation to keep cooling and heating costs down

Gas boosted solar hot water systems are cool and produce fewer greenhouse gases
