Notice

To Electricity Industry Code Participants,

In accordance with section 5.3(a) of the SWIS Communication Rules, the following advises of Western Power's intention to make changes to its Network Billing Specification documentation¹ and upgrade its market facing systems. This Notice will be referenced herein as Network Billing Change Request #3.

Under Network Billing Change Request #3, Western Power intends to update its Network Billing Specification documentation in-line with the improved invoice information associated with 12 month Rolling peak whereby timestamp is being now provided.

This is a two-stage consultation process of which the first stage is to find out expression of interest from participants whether they are interested in the above change.

The next stage is dependent on the participants feedback.

All Code Participants are encouraged to review the detail of this notice and investigate how the changes will / may impact their systems.

Western Power will be available to meet if requested to discuss questions that individual Code Participants may have. Please send meeting requests to billing.networks@westernpower.com.au.

Code Participants are invited to submit written comments on the proposed changes to billing.networks@westernpower.com.au by no later than 16:00 WST 15 December 2021.

Network Billing Change Request #3

Network Billing Change Request #3 proposes amendments to **Appendix B: Tariff Component Codes** of the Network Billing Specification documentation to include the:

- Insertion of timestamp for 'Billed 12-month Rolling Peak' information lines on the RT05 and RT06 services

Amendments

The proposed amendment of two new Network Tariff Component Codes is shown in the table below.

Network Tariff Component Code	Line Description
RT05-I-PH	High Voltage Metered Demand - Info - Rolling 12-Month
RT06-I-PH	Low Voltage Metered Demand - Info - Rolling 12-Month

These codes are proposed to be introduced to assist with Code Participant's validating charges for the Low Voltage Meter Demand (LVMD/RT06) and High Voltage Meter Demand (HVMD/RT05) tariffs by providing the rolling 12-month peak demand information used in the calculation of these tariff charges.
