OneAdvanced Opportunities Hub

Western Power's Tendering Platform

OneAdvanced Opportunities Hub is Western Power's new tendering platform. It presents a modern, streamlined platform to allow suppliers to put their best foot forward when tendering for work.

When invited to participate in a sourcing event you will receive an email invitation with a link to view the event.

If you haven't already used the OneAdvanced platform click the "Account Registration Link" to create an account. Otherwise click View Item to see the invitation.

Note: the system uses Microsoft Authenticator for Multi Factor Authentication to increase security. Instructions to use Authenticator can be found here.

The Home tab contains the Opportunity List of all tenders you have been invited to submit a response. Click the tender for more information (contained in section A) such as a summary of the opportunity, the response close time and details on the requirements of submitting a bid.

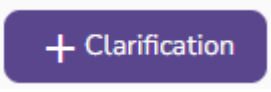

Use the Register intent to respond section at the bottom of this view to access the event and see further information like the contract and the submission requirements.

1 Details

Each tender is different but in most cases the event will include the conditions of tendering (section B), the proposed contract (section C), qualitative questions (section D) and returnable schedules (section E). Please download and review all this documentation. There may also be supporting information that will provide further context about the opportunity.

Western Power does not utilise the Requirement and Compliance Items section at this time. This information is contained in the contract documentation.

2 Clarifications

Use 

in the Clarifications section to ask questions regarding the tender. Ensure you tick Commercial in Confidence if you do not want other invited suppliers to view your question. You will receive an email when we respond.

3 Addenda

Any changes to documentation or the submission time will appear in the Addenda section. You will also receive an email notification when addenda are posted.

4 Response/Bid

Following the requirements outlined in Section A of the tender, go to Response/Bid to build your response. For fixed price tenders enter your price in Value. Where the tender is requesting a schedule of rates or similar enter $0 here.

You can provide some high-level information in Comments/Details.

Use 

to add attachments of the documents you have been requested to provide.

Any other information you would like to submit can be placed in Supporting Documents.

Press Save to save your response. Press Submit when you are ready to respond.

5 Support

For any technical queries relating to logins and passwords please contact s2c.support@westernpower.com.au

For any other support please contact the Sourcing Specialist listed in your tender.
