Solve the scramble

Did you know that more than 1 million customers are connected to the Western Power network?

The Western Power electricity network or grid is made up of many pieces of equipment for moving electricity around.

Can you name the equipment by unscrambling the letters. Then complete the sum to discover how many pieces of that equipment we maintain.

				r e t w o _ _ _ _ _ 9 2 3 5 - 2 1 2 5 _____ =	u d g e r n r o n u d a c b e l _ _ _ _ _ _ _ _ _ _ _ _ _____	s b u s a t t i n o _ _ _ _ _ _ _ _ _ 3 1 x 5 _____ =	e e g t t l i h s r t _ _ _ _ _ _ _ _ _ _ _ 5 7 1 3 2 1 + 2 3 3 3 4 2 _____ =	v e o r h d e a o w p e i l s e n _ _ _ _ _ _ _ _ _ _ _ _ _ _ _ _ _ _

Western Power has more overhead powerlines (70,063.2km) than underground electrical cables (24,239.7km).

Which sign would make this sentence true? 76,063.2 ? 24, 23.7 < > =
